## Work & Education

### Vue developer

May 2021 - Present

Arnia software, Bucharest (Romania)

- Role: Work closely with customers to develop their applications using component-based structures, manage front-end data and provide interactive user functionality for graphical applications
- Technologies: Javascript, Vue, Vuex, bootstrap, less, jira, azure
- Work methodology: Agile

### Javascript developer

May 2019 - April 2021

Advahoo, Bucharest (Romania)

- Role: Frontend and UI /UX, occasionally assisting the client's QA team and product owner in prioritizing tasks
- Technologies: Javascript, Ojet, react, less
- Work methodology: Agile

### Full stack developer

Between jobs

Individual contracts

- Role: Development of presentation websites and web applications for data management
- Technologies: Ruby on rails, django, vue, jira
- Work methodology: Cascade, Agile

### Full stack (java and frontend) - Internship

3 months

Unicredit Services, Bucharest (Romania)

- Worked on the Frontend and UI/UX on a project made for a particular group of clients. Providing and implementing solutions for their needs.
- Implement Backend APIs in JAVA in concordance with Business logics

### Bachelor degree in Computer Science

3 years

University of Bucharest, Bucharest (Romania)

Subjects I've been passionate about: oriented object programming, functional programming, web development and their relationship to each other. My interest in these topics also extends to the exploration of web frameworks and other web technologies and their application

## Skills

#### Worked most with

VUE JAVASCRIPT SCSS HTML5

#### Technologies and Concepts I worked with

REACT REDUX TYPESCRIPT VUEX NODEJS LESS  
BOOTSTRAP UIKIT RUBY ON RAILS MONGODB  
GRAPHQL GATSBY JIRA UNIT TESTING LINUX  
GIT NPM PYTHON DJANGO MVC REST OOP  
AGILE AJAX JQUERY OJET

## Projects

### Personal trainer site and blog

A blog and a custom personal page for a personal trainer, made in express and mongodb. The trainer can login and edit articles, add totutorials with images and videos. Each on its own section. The site is simple designed and lite coded destined to be simple to read and to run fast. All the dynamic content that the trainer is added is updated on cloudinary using the cloudinary API.

- Used database: MongoDB, cloudinary
- Frontend tool kits: ui-kit3, jquery, less
- Backend: Express, EJS

### Skyline

Modular article manager in Ruby on Rails that supports database replication using Octopus gem, paragraph editing, photo galleries, user profile, search, and tags for each article. In addition to this project, I made a fully functional replication topology that worked with this application.

- Used database: MySQL
- Frontend tool kits: ui-kit3, jquery, less
- Backend: Ruby on Rails
